SUMMARY

Mobile Software Engineer and Tech Lead with 13+ years of experience shipping iOS and Android apps used by millions. Proven track record reducing 800+ bugs to near-zero, scaling user bases from 5M to 11M, and leading cross-functional teams of up to 16 engineers. Deep expertise in Swift, Kotlin, CI/CD pipelines, AWS cloud architecture, and AI-assisted development workflows.

SKILLS

Mobile: Swift, SwiftUI, UIKit, Objective-C, Kotlin, Jetpack Compose, Kotlin Multiplatform, Flutter, Dart

Architecture: MVVM, VIPER, MVC, MVP, Clean Architecture, Modularization

Backend & Cloud: Node.js, Java, Spring, AWS (EC2, Lambda, S3), Docker, Kubernetes, OpenShift

DevOps & CI/CD: Jenkins, GitHub Actions, Fastlane, Containerized Deployments, DevSecOps

Databases: SwiftData, CoreData, Realm, MongoDB, Oracle, SQL Server, SQLite

Tools & Practices: Git, Agile/Scrum, AI-Assisted Development (Claude Code), Pair Programming

PROFESSIONAL EXPERIENCE

Tech Lead & iOS Developer Sr — Sistema de Transferencias y Pagos STP | 2022 - Present

- Reduced app defects from 800+ open bugs to under 10, measured by bug tracker backlog, by leading a 4-person team through systematic triage, root-cause analysis, and targeted refactoring
- Architected and delivered PagApp (interbank transfer platform) and STPCoDi (CoDi payments by BANXICO), processing high-volume daily transactions by designing scalable native iOS and Android architectures
- Accelerated feature delivery and code quality by integrating AI-assisted development tools (Claude Code) into the team's workflow, reducing development cycle time

Tech Lead & Manager — Grupo Salinas / Banco Azteca | 2018 - 2022

- Grew Banco Azteca app user base from 5M to 11M users, measured by App Store/Play Store analytics, by shipping weekly feature releases and improving app stability
- Launched Super App BAZ from zero to production (payments, transfers, streaming, social, marketplace), serving millions of users, by leading architecture, development, and coordinating a 16-person cross-functional team (Backend, Frontend, QA, UX)
- Reduced crash rate to consistently low levels, measured by Crashlytics dashboards, by establishing code review standards, automated testing, and CI/CD pipelines
- Implemented containerized deployment infrastructure on AWS using Docker, Kubernetes, and OpenShift, cutting deployment time and improving release reliability
- Developed backend microservices with Node.js and MongoDB to support mobile features at scale

Java Developer Sr — Grupo Proyectos Estrategias Empresariales | 2015 - 2018

- Delivered a payroll processing system handling data for multiple organizations, measured by zero data-integrity incidents post-launch, by designing reliable backend services in Java with Spring and Hibernate
- Built a secure digital platform for psychology professionals, enabling HIPAA-adjacent data handling, by implementing encrypted data storage and role-based access control

Android Developer Jr — Grupo ID Soft / ISC Control Inteligente | 2014 - 2015

- Implemented geolocation-based attendance system for workforce management on Android, achieving 95%+ location validation accuracy, by integrating GPS with network-based fallback mechanisms

Android Developer — Secretaria de Gobernacion (Mexico Federal Government) | 2013 - 2014

- Reduced infrastructure downtime response time, measured by faster alert-to-action cycles, by developing a country-wide network monitoring Android app that detected link outages and triggered real-time alerts to administrators

EDUCATION

B.S. Computer Systems Engineering | Specialty: Web Systems Development

Tecnologico de Estudios Superiores de Chalco | 2009 - 2013

CERTIFICATIONS (Selected)

- Red Hat OpenShift Development I (2020)
- Architecting on AWS - Netec (2019)
- Red Hat System Administration I & II (2019)
- iOS 12 & Swift 4, iOS App Development (2020)
- Introduction to DevSecOps - Grupo Salinas (2019)
